Abdeslam Gacemi

As a senior full-stack developer and UI/UX designer, I have over 6 years of experience creating effective and aesthetically pleasing digital products. Self-taught and resolutely solution-oriented, I am involved in all stages of the development cycle, from interface design to back-end architecture. My approach combines technical expertise, meticulous attention to detail, and a design-driven culture to deliver seamless, consistent, and high-value user experiences.

Intervalle Technologies
Full-stack developper and graphic designer

As a web developer and graphic designer at Intervalle Technologies, I played a central role in developing and maintaining the company's websites, ensuring optimal functionality and a smooth user experience. In addition, I contributed to the brand's visual identity by designing impactful social media templates and various printed materials, including brochures, banners, and flyers. This dual role allowed me to combine technical expertise with creative design, contributing to the overall success of Intervalle Technologies' online presence and marketing materials.

Ahmed Belhadj - Branding (freelance)

As a freelance graphic designer and full-stack web developer, I led a comprehensive branding project for Ahmed Belhadj, a distinguished banking consultant in the field of software development. Overseeing the entire creative process, I conceptualized and designed a distinctive logo, carefully selected a cohesive color palette and fonts, and created a captivating logo reveal animation. Furthermore, I extended the brand identity across various platforms, including website design, social media templates, and custom icons, resulting in a unified and visually striking representation of Ahmed Belhadj's professional profile.

Tinhinane Messerli - Branding (freelance)

As an experienced freelance graphic designer and full-stack web developer, I led an engaging branding project for Tinhinane Messerli—a qualified banking consultant and Japanese language teacher. Taking a holistic approach, I created a unique logo that captures the essence of her diverse expertise. By meticulously selecting complementary colors and fonts, I ensured that the visual identity was harmonious. The project extended to the creation of captivating social media templates and charming mascot emojis, all closely linked to the logo, providing a compelling and unified brand image for Tinhinane Messerli.

Abdeslam Gacemi - Branding & développement web

I launched and executed a comprehensive personal branding project, leveraging my skills as a web developer and graphic designer. I led the design and coding of a dynamic portfolio showcasing my diverse talents. I personally created a distinctive logo, accompanied by an engaging logo reveal animation, and developed cohesive social media templates. This project not only strengthened my technical abilities, but also established a compelling online presence that reflects my unique professional identity.

Application web bancaire - Intervalle Technologies

As a frontend web developer, I had the exciting opportunity to contribute to the creation of a dynamic and secure banking web app using Angular. Responsible for developing user interfaces, I designed and developed intuitive screens for various banking features, such as login screens, dashboard screens, etc.

`Javascript` `Angular` `HTML` `CSS`

1SPECT Application web

As a backend web developer at "1SPECT," working with the team as a PHP developer, I contributed to the creation of a robust platform that streamlined interactions between inspection companies and their clients. From inspection report downloads to inspection schedule management, my backend development expertise ensured a smooth and efficient user experience, enabling both companies and customers to thrive.
